

# QStar Axxess

DVD-ROM | CD-ROM

With the proliferation of CDs and DVDs in the data storage environment, the need to efficiently manage them has become critical.

QStar meets that storage management need head-on with CD/DVD Axxess. QStar's Axxess provides the degree of control and performance essential for fast access to your company information.

Caching technology, minimizing mount points and providing ease of management of varying CD and DVD types makes QStar's Axxess the obvious choice to control your disk storage.

## STANDARDS BASED FORMATS

QStar's Axxess supports the ISO 9660 standard together with Rock Ridge and Microsoft extensions as well as the Universal Disk Format (UDF). This ensures that long file name support and compatibility are available in a variety of operating environments.

## MULTI MEDIA SETS

By allowing multiple CDs or DVDs to be grouped together, a reduced number of mount points or drive letters are required. Within a media set, each CD or DVD may be seen as a sub-directory.

## FULL DIRECTORY CACHING

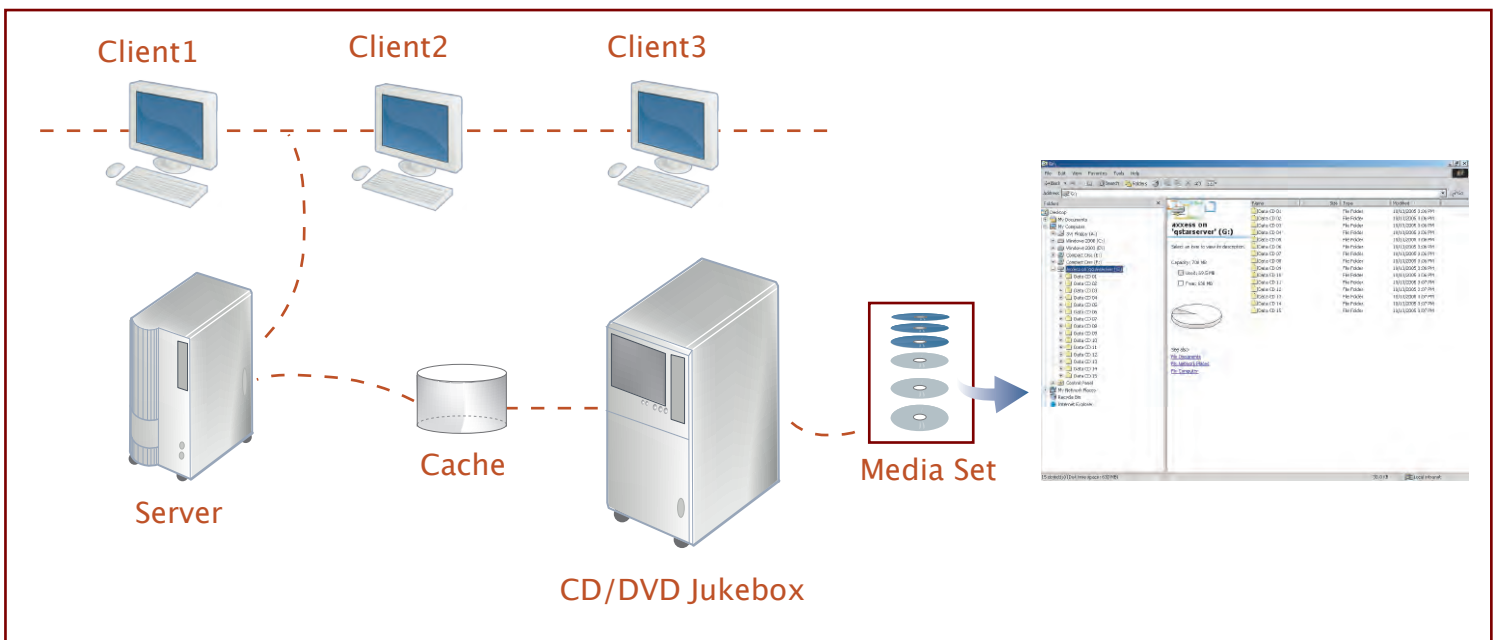

By caching the directory structures of all of the CDs and DVDs, performance is increased by eliminating the need to repeatedly access the jukebox. Directory caching of disks provides off-line data management for CDs and DVDs, which can then be removed from the jukebox.

## FULL MEDIA CACHING

QStar Axxess can cache an entire CD or DVD if required; meaning the media no longer has to reside in the jukebox for the data to be available to the users. This feature may be used for individual media or by default on all of them.

## SET MANAGEMENT

CDs and DVDs may be added and removed from media sets while the set is mounted. When using offline volume management, QStar Axxess will prompt for media to be added and removed from jukeboxes as needed.

### FEATURES AND BENEFITS

 **Standards Based Formats**

 **Full Media Caching**

 **Set Management**

 **Multi Disk Sets**

 **Full Directory Caching**

### QStar Services

- Standard 90 day Warranty
- Hot Line Support
- Remote Diagnostics
- Onsite Support
